一、概述 Introduction

耐普消防泵产品依据国标GB6245、美国NFPA20等消防标准研发设计，产品的性能、质量达到国际先进水平，并取得中国国家消防强制性产品3C、美国FM认证。

耐普泵业消防泵产品具有五大优势：

安全: 泵系统内置过压和超速保护装置；泵承压部件经过3MPa及3MPa以上的水压试验、密封试验；泵组经4小时以上的性能试验；产品出厂前通过国家公安部消防产品合格评定中心或美国FM检测机构检测。

可靠: 配备消防专用驱动机，泵组从零流量到最大流量实现无极调速，加速快（10秒内达到额定工况）、过载能力强。

节能: 采用耐普最新一代高效能泵，产品通过电能、节能认证。

舒适: 采用夹心钢板、高性能吸音材料、海绵等多种吸音结构设计，设备运转噪音可低于85分贝。

智能: 采用耐普第三代智能控制系统，具有自动巡检、自动诊断、语音提示、无线监控等特点，确保系统始终处于最佳待机状态。

All the development and design of Nep products are followed Chinese standard GB6245 and USA NFPA20 fire protection criteria. The quality and performance of those products are reached the international advanced level and have obtained Chinese fire control product compulsory product certification 3C, USA FM APPROVALS.

Five advantages of Nep's fire pump products:

Safety: there are overpressure and over-speed protection device inside the pump system. The pressure-containing members of pump were tested by hydrostatic test and leakage test which are equal or greater than 3MPa. All the pump sets will be tested over 4 hours for performance test. All products have to pass strict inspection by the State Quality Control Center of the Ministry of Public Security or American FM testing organization before delivery.

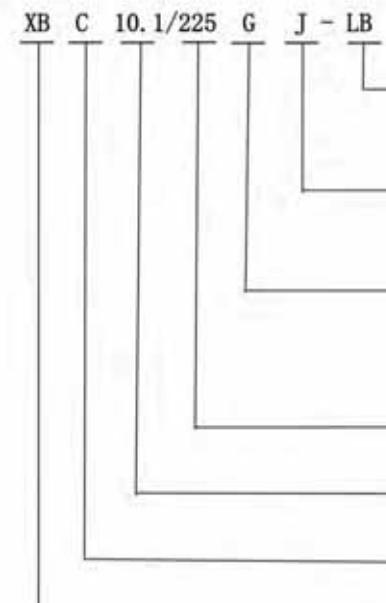

Reliability: matched with fire-service special drive. Stepless speed are achieved from zero flow to maximum flow, with fast acceleration (rated condition can be reached within 10 s) and strong overloading ability.

Energy conservation: Latest Nep's high-effect pump are adopted, which passed electric energy and energy-saving certification.

Comfortable: various of sound absorption physical design are adopted, such as sandwich steel plate, high-performance damping material, sponge,etc. Equipment running noise will below 85 dB

Intelligence: Nep's third generation intelligent control system are adopted, which has the functions such as automatic inspection, automatic diagnosis, voice prompt, wireless monitoring, to make sure the system are always in good condition.
